

## **Runnymede Healthcare Centre Long-Term Care UPDATE**

**April 28, 2021**

---

Construction of our new Long-Term Care Facility continues with great progress, and we thank you for your continued patience, and cooperation. The shoring and excavation operations will continue along Runnymede Road and St. Johns Road over the next few weeks, as well as northbound along Fisken Avenue.

Mass excavation will also continue, resulting in increased truck traffic, and storm-sewer work near the existing hospital is also expected to commence; daily cleanup and inspections will continue. Please note you should expect to experience some noise and vibrations on an ongoing basis for the next few months.

In response to the province's updated regulations for such projects, in an effort to expedite the work, to mitigate lost time due to weather, and due to the importance and the critical nature of the long-term care facility, the contractor is anticipating working on Saturdays, as well as some occasional extended hours.

Please be assured that all health and safety protocols will remain in place at all times of work operations, and that vibration monitoring remains installed, and is being monitored for any potential structural impacts.

We do not anticipate disruption to patient activity or care, and we continue to work closely with our clinical teams to ensure that any disruption remains at a minimum.

Thank you for your continued understanding, patience, and cooperation.
