

Runnymede Healthcare Centre Long-Term Care

UPDATE

February 3, 2023

Construction of the new Runnymede Long-Term Care Facility continues, and as always, thank you for your continued patience, and cooperation.

Below grade parking structure continues with the lowest parking level (P2) complete, and the other parking level (P1) nearing completion to grade work. The center portion and West portions have L1 level installed and are now proceeding to Level 2 (L2). Mechanical and Electrical services also are progressing in accordance with the structure.

Significantly large concrete pours will continue over the next several months which will result in extended work hours to ensure the concrete is placed and finished properly.

Update of utility works executed by the City of Toronto to support the Runnymede LTC project across Fiskens and Runnymede now have been completed, as has Hydro off of Runnymede.

The project has experienced some delays unfortunately and the team continues to work on improvements and mitigation.

Temporary sidewalk and lane closures will also continue on the north side of St. Johns to safely facilitate large deliveries and installations.

We continue to emphasize to the Construction team that all by laws must be respected and adhered to.

As always, all health and safety protocols will be the utmost importance to the project team and will be followed at all times. As the structure continues above street level, new intense safety measures become implemented.

We do not anticipate disruption to patient activity or care, and we continue to work closely with our clinical teams to ensure that any disruption remains at a minimum.

Thank you for your continued understanding, patience, and cooperation.
