

**Runnymede Healthcare Centre
Outbreak Update**

Updated: April 30, 2024

A Human Metapneumovirus outbreak was declared on April 25, 2024, by Toronto Public Health on the 4 East unit at Runnymede Healthcare Centre.

Visitations on the 4 East are to be minimized. Only patients with respiratory symptoms will have restricted activities inside the patient's room. All non-symptomatic patients on the 4E unit are allowed to participate in activities outside of the room but cannot leave the unit.

Please note that video calling is available. Please be assured that we are following all guidance from Toronto Public Health, and are taking every safety measure to ensure we protect the health, and safety of all our patients, and staff.

Thank you.
